## (54) PHOTOGRAPHIC MATERIAL

### (57) Abstract:

PURPOSE: To provide a photographic material capable of easily forming a black- and-white or color image.

CONSTITUTION: At least (1) a supporting body, (2) a photosensitive element containing at least a photosensitive silver halide, a hydrophilic binder and a coloring matter-supplying compound forming or releas-

ing a diffusible coloring matter corresponding or reversely corresponding to exposure, (3) a foaming layer, which contains at least the hydrophilic binder and a compound generating a gas by heating or light heating, is light transmissive before exposure and is made opaque by heating or light heating to form a white reflecting layer, and (4) a coloring matter fixing element having a coloring matter fixing layer, on which the diffusible coloring matter formed or released in the photosensitive element by developing is diffused and fixed, are laminated in this order.
